

Supporting Your Practice through Specialized Testing

Mayo Clinic Health System (MCHS) in Mankato Laboratory enhances patient care within the communities it serves. We provide high-quality results in a timely manner with cost effective testing methods and instrumentation. This allows patients to stay local and reduce the need to travel to a larger destination hospital.

Mayo Clinic Health System laboratories view testing as an integrated part of each patient's episode of care. Our assays and algorithms are jointly developed by Mayo Clinic laboratory experts and Mayo Clinic physicians around each patient's medical diagnosis and treatment. This algorithmic approach ensures that you receive the right test for the right patient at the right time.

Our laboratory is fully accredited by the American Association of Blood Banks (AABB) and the College of American Pathologists (CAP). We meet all of the Department of Health and Human Services (HHS), Minnesota Department of Health (MDH) and Clinical Laboratory Improvement Amendment (CLIA) requirements.

Mission

As the Department of Laboratory Medicine and Pathology within Mayo Clinic Health System, we will inspire hope, and contribute to health and well-being by providing the best care to every patient through integrated clinical practice, education and research.

Vision

We will provide an unparalleled experience as the most trusted partner for health care.

Value Statement

The needs of the patient come first.
